

Enhanced Aesthetic, Environmental Friendly and Sustainable

LMH28

LMH28 is a lightweight film with excellent whiteness, gloss, and mechanical properties required for mono web wrap-around labeling.

Its improved aesthetics bring high shelf appeal, while its reduced packaging weight offers higher efficiencies that enable brand owners to reduce cost, making it a more sustainable solution.

Thanks to its unique design and mechanical strength, it is a perfect replacement for thick transparent plain BOPP films currently used for labeling waters or carbonated soft drinks, with little to no modifications required.

Technology

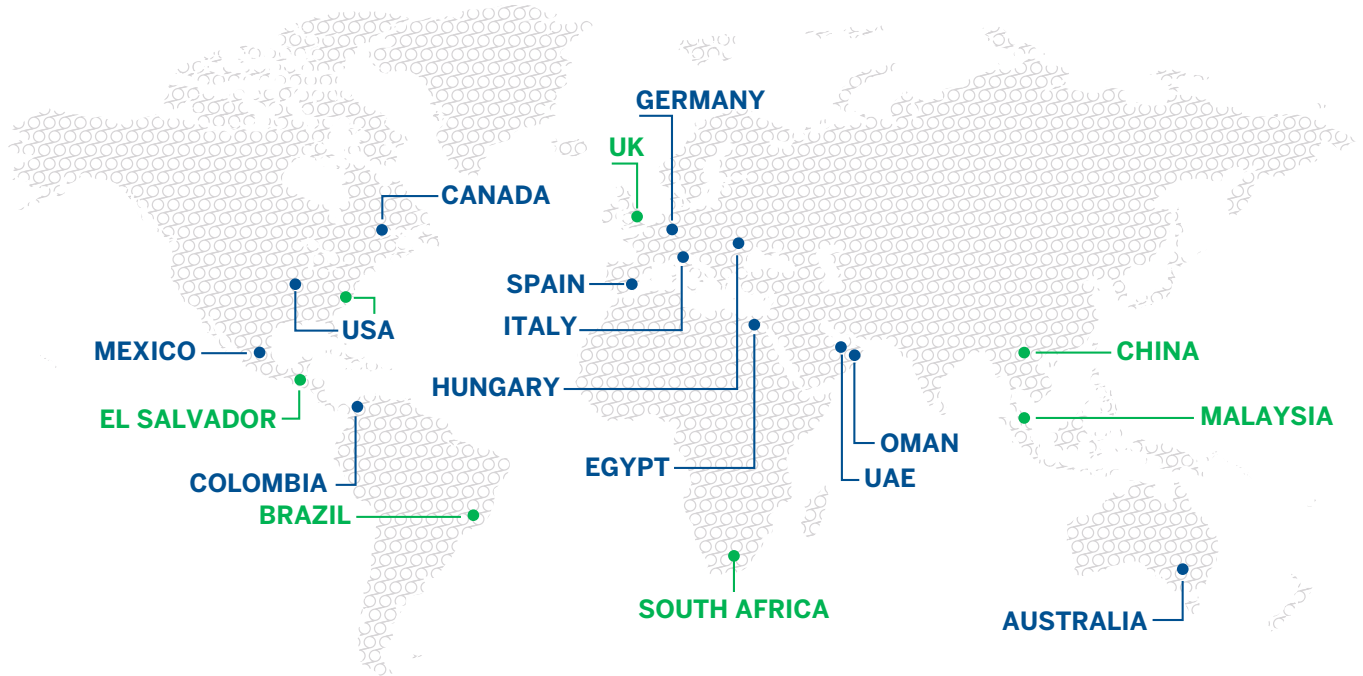

- Compatible with Rotogravure, Flexographic and Off Set Printing Technologies
- Ease of cutting and pick up on the vacuum drum
- Reel Fed Technology

Benefits

- Excellent Whiteness and Gloss Appearance
- High Yield due to Thin Gauge
- Outstanding Mechanical Properties for Machinability
- Symmetrical Structure thus No Curling
- Consistent Slip
- Environment Friendly at lower cost

Applications

- Monoweb Wrap around labels (e.g. Water Bottles, Carbonated Softdrinks, Juices, Edible Oil)
- Laminate form with reverse printed transparent BOPP film
