

San Giorgio di Nogaro, 6th February 2023

To all Taghleef's customers

**Subject: Environmental labelling**

The Legislative Decree no. 116/2020, which incorporates the EU directive 2018/851 on waste and directive 2018/852 on packaging and packaging waste, establishes that producers must indicate on all primary, secondary, and tertiary packaging the nature of the materials used, by the decision 97/129/EC by the Commission. The Ministerial Decree no. 360/2022 completes this regulatory framework by introducing the environmental labelling guidelines to be followed by the responsible subjects to comply with the environmental labelling obligations.

The films that Taghleef Industries sells on the market are classified as neutral packaging as they do not carry printing or graphics. To comply with the regulations, Taghleef Industries identifies the base materials of its packaging films by communicating the relative alphanumeric code in the transport documents accompanying the goods. However, the Guidelines also allow the use of digital channels to replace the information reported either on the documents or on the packaging.

Furthermore, since 01.01.2023, Taghleef Industries has been communicating to its customers the identification codes of the products used for the packaging of the reels by adding the following table to the transport documents:

 <b>Componenti imballo</b>	FOGLI/DISCHI CARTONE: PAP20	TAPPI/CONI: PP5(HDPE02 verticalreels)	REGGETTA: PP5
FLANGE/PANNELLI LEGNO: FOR50	FLANGE/PANNELLI PLASTICA: PP5	BANCALI: FOR50	FILM ESTENSIBILE: LDPE4
FILM MILLEBOLLE: 7	MANDRINO: PAP21	ETICHETTE:	LISTELLI: FOR50
FOGLI IN PE: LDPE4	NASTRO ADESIVO:
