

## Adhesive-less label film

Thickness: **70 - 100  $\mu$ m**

Look: **White voided**

## DESCRIPTION

The newly introduced adhesive-less label film has a white glossy pearlescent appearance and optimum coverage and opacity for exceptional contrast between the printed image and background.

## PARTNERSHIP

This collaboration shows a new application in *TI*'s labels range: food grade inserts or labels which are cut-to-size for direct food contact in various shapes and sizes. The printer **Tipolito Bolondi** is an Italian company specialized in the printing of food labeling systems suitable for direct food contact.

## TECHNOLOGY

- Offset, flexo and rotogravure printing
- Rotary, flat-bed and high die-cutting technology

### Benefits

- Lower thickness than cast PP and PS films
- Enhanced print results
- Suitable for direct food contact (dry and fatty foods)
- Excellent printability and drying
- Excellent flatness

### Applications

- Cured meats
- Poultry and fish industries
- Cheese
- Fresh and aged food
