

FOR IMMEDIATE RELEASE

TAGHLEEF INDUSTRIES S.p.A. EARNS TWO ISO SUSTAINABILITY CERTIFICATIONS

CARBON FOOTPRINT OF PRODUCT – SYSTEMATIC APPROACH and GREENHOUSE GASES INVENTORY OF ORGANIZATIONS

Dubai, UAE and San Giorgio di Nogaro, Italy – 23 October, 2020 – Taghleef Industries (*Ti*) announces that two sustainability certifications have been issued to their Italian production site: Carbon Footprint of Product – Systematic Approach/ISO 14067:2018 Annex C and Greenhouse Gases Inventory of Organizations/ISO 140641:2018.

The evolution of European legislation, and mainly the European Green Deal, has led Taghleef to focus on carbon management. The Carbon Footprint of Product – Systematic Approach (CFP SA), developed according to ISO 14067:2018 Annex C and certified by an accredited verification body, is a tool for the quantification of CFP that allows for the cradle-to-gate assessment of a single *Ti* S.p.A. product for each customer, expressed in kg of CO₂ equivalent. CFP SA is based on the LCA (Life Cycle Analysis) methodology and is therefore focused on climate change.

Further, the Greenhouse Gases Inventory of Organization (GHG Inventory), certified by an accredited verification body, has also been implemented according to ISO 14064-1:2018. The GHG Inventory is based on the quantification and reporting of direct and indirect emissions of greenhouse gases of the Italian production site, located in San Giorgio di Nogaro, with reference to base year 2018.

These certifications align with Taghleef's Dynamic Cycle™ program and the company's holistic approach to addressing sustainability issues for both internal and external stakeholders. More information on *Ti*'s Dynamic Cycle and sustainable solutions can be found at dynamiccycle.ti-films.com.

About Taghleef Industries

Taghleef Industries (Ti) is the leading supplier of specialty and high performance films for packaging, labels, industrial, and graphic arts applications. Headquartered in Dubai with manufacturing sites in eleven countries on six continents, the company has annual capacity of 500,000 metric tons of BOPP, CPP, and PLA films for the global marketplace. Ti delivers intelligent packaging solutions and sustainable added value to customers and stakeholders through innovative research, high quality film products and focused service.
